Profile

Full-Stack & Mobile Developer with hands-on expertise in Next.js, React Native, MERN, and PERN stacks. Skilled in building high-performance web applications, scalable REST APIs, and cross-platform mobile apps. Passionate about rapid MVP development, clean architecture, and modern UI/UX execution.

Featured Projects

Full-Stack Web App (Next.js & Node.js)

Built a scalable web platform featuring full-stack authentication, responsive dashboard, custom API routes, and optimized database architecture.

Cross-Platform Mobile Application (React Native)

Developed a smooth mobile app UI with local state management, real-time API integrations, and native device performance.

Achievements

- Built and shipped 10+ live web & mobile projects using Next.js and React Native.
- End-to-end expertise in MERN/PERN full-stack architecture & database design.
- Active open-source contributor and technical content creator.
